**Re: KLDX-SMT2-0202-ATR and KLDX-SMT2-0202-BTR**

The plastic material used for the above part numbers has changed from PA9T to PA10T. Because the material changed, the part number is no longer UL approved. The UL logo has been removed from our specs and the part numbers will be removed from the UL certification at the next revision.

Please note that the solder profile and the performance of the parts have not changed.

The last date code produced with PA9T is 1703.  
The new plastic will be on part numbers with date codes after 1703.
