Re: EOL

Part number: KLDPX-0302-A; KLDPX-0302-B

The part numbers listed above are discontinued due to broken tooling. We can offer a last time buy only if we have stock.

Kycon KLDPX-8013 series may work as an alternative. This is not exact replacement and should be evaluated prior to purchase. Please see the attached drawing and contact your Kycon sales representative for more information.

We've also found the following Switchcraft parts that may work for your application. Drawings are attached for your reference.

| Kycon P/N | Suggested competitor alternate |
|--------------|--------------------------------|
| KLDPX-0302-A | Switchcraft L722A |
| KLDPX-0302-B | Switchcraft L712A |

Please note that we cannot guarantee that the competitor part will properly lock with your current mating plug. We suggest you sample from Switchcraft to insure proper mate.
